Zippers

Nylon Zippers are more suitable for knitted garments because of their flexibility. Coats recommend 'Lightning' Zippers for strength and reliability and for the large range of colours and sizes. Make sure the opening is long enough for the knitting to be very slightly eased into the zip, to prevent a bulging zip. The edges of the opening should be close to the teeth of the zip and not cover it as in dress-making.

To keep the base of the opening neat, cast off one or two stitches at the division of the opening. Stitch the zip into position with small running stitches using Coats Drima and finish the edges by slip-stitching lightly to the garment.

Flat Seam.

This method is sometimes used for knitted garments but more often for crochet garments. A flat seam may be worked from either the right or the wrong side of the work. Place the 2 pieces of fabric evenly together and sew stitch by stitch, always bringing the needle up from underneath to top through the centre of the stitch, then in same manner through corresponding stitch on second piece of fabric.

Note—Diagram shows knitted fabric, but method is the same for knitting or crochet. Always keep work elastic—there should be as much stretch in your seam as there is in the rest of your garment.

MAKE UP. With a slightly damp cloth and warm iron, press lightly. Using back-stitch, join side and sleeve seams. Press seams.

Make this tension check.

Take the needles and yarn specified in the instructions, cast on 40 sts and knit a square in stocking stitch. Check the tension **very accurately** by placing a tape measure or rule across the centre of your work and marking 10 centimetres with a pin at each end. Count the number of stitches between the pins.

If you have too many stitches between the pins your tension is too firm — try a size larger needle. If you have too few stitches between the pins your tension is too loose — try a size smaller needle "**Less is Loose.**"

If you need to change your needle size to obtain the correct tension in stocking stitch, you must also make corresponding alterations. (i.e. larger or smaller needles) to all needle sizes mentioned in the instructions. It should be noted that even if the needle size needs to be changed to achieve the correct tension, it will make no difference to the length of time required to complete your garment, as you will be working with the same number of stitches.

WASHING INSTRUCTIONS

BEFORE WASHING—Make any needed repairs. Remove any unwashable buttons or trimming, close zip and **turn garment inside out.**

WASHING—Please don't pre-soak. Ordinary washing powders are not designed for washing wool. We advise that you use **SOFTLY**, recommended by The Australian Wool Corporation to keep your woollen garments looking like new. And it's great for synthetic garments too.

Powder should be fully dissolved in warm (**not hot**) water before immersing garment. Squeeze the garment gently in the suds; do not rub.

RINSING—Rinse garment thoroughly in warm (**not cold**) water, until the water is clear. Support your garment with both hands whenever you lift it to prevent stretching.

DRYING—After the last rinse, spin dry the garment or squeeze it between towels to remove excess water. Dry naturally on a flat surface out of direct sunlight. **Never hang a hand-knitted garment.** When drying colour-contrast knitteds, do not leave contrasting areas in contact with each other in the wet or damp state.

Do not tumble dry.

PRESSING—Generally, woollen or cotton garments should be pressed with a warm iron and a slightly damp cloth.

Yarn colours illustrated have been reproduced as accurately as the printing process permits.
